EDUCATION

2025-2027
SITCOE YADRAV.

- M.Tech in Artificial Intelligence & Data Science (AIDS) – Pursuing

2021
MEERUT UNIVERSITY

- BTECH in Computer Science & Engineering
- 74.84%

2017
DR. J J MAGDUM COE

- Diploma in CSE
- 74.38%

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java, C, C++
- **Data Analysis & Processing:** Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- **Data Visualization:** Matplotlib, Seaborn, Power BI, Tableau, Advanced Microsoft Excel
- **Databases:** MySQL, PostgreSQL, MongoDB

PREMKUMAR MAHAJAN

DATA ANALYST

PROFILE

PROFILE SUMMARY

Aspiring Data Analyst with a strong foundation in data analysis, data preprocessing, SQL, and analytical problem-solving, supported by 5 years of experience in software development and enterprise application projects. Experienced in working with structured data, database integration, and data-driven application workflows. Familiar with data cleaning, exploratory data analysis (EDA), data visualization, and machine learning-based classification and recommendation systems. Currently pursuing an M.Tech in Artificial Intelligence and Data Science, with an interest in transforming raw data into meaningful insights to support informed business decisions.

WORK EXPERIENCE

Racksons IT Developers Private Limited JAN-2022 - JAN 2026

Data Analyst| Pune, India

- Worked on enterprise applications involving structured data, database integration, and multi-user business workflows.
- Collaborated with backend developers to integrate REST APIs and retrieve, process, and display application data.
- Worked with SQL and application data structures to support data-driven features and record management.
- Supported data validation, application testing, debugging, and consistency checks across business workflows.
- Contributed to the development of healthcare and agriculture-related applications involving operational records and information management.
- Coordinated with cross-functional teams to improve application functionality, data accessibility, and overall system reliability.

PROJECT EXPERIENCE

Hospital ERP System with Multi-User Functionality Apr-2022 to Nov-2022

- Analyzed structured hospital data to identify inconsistencies, missing values, and duplicate records.
- Worked with SQL queries to retrieve, filter, and organize patient, appointment, and medical record information.
- Performed data validation to maintain consistency across multiple user records.
- Organized healthcare information to support operational reporting and record management.
- Collaborated with the development team to ensure accurate data retrieval and integration across hospital management modules.

Farmer ERP Website Feb 2023 – Jul 2023

- Organized agricultural product information into structured and categorized datasets.
- Worked with JSON-based data to manage and validate product information.
- Identified inconsistencies and ensured data accuracy during information processing.

- **Machine Learning & AI:** OpenCV, Natural Language Processing (NLP), Deep Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Agentic AI
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js
- **Frameworks & Libraries:** Flask, Django

- **Version Control & Tools:** Git, GitHub, Postman, Visual Studio Code
- **Other Skills:** RESTful APIs, Responsive Web Design,

LANGUAGES

- **Hindi**
- **English**
- **Marathi**

HOBBIES

- **Traveling**
- **Cricket**
- **Reading Books**

- Analyzed product-related attributes to support categorization and comparison.
- Supported data retrieval, filtering, and presentation to improve access to agricultural information.
- Assisted in validating information received through application APIs.

Advanced Fashion Recommendation System Jan-2024 to Mar-2024

- Organized fashion product attributes and related information for analysis.
- Examined user preferences and fashion-related features relevant to recommendation generation.
- Supported the interpretation and categorization of product and image-based information.
- Analyzed recommendation outputs to understand their relevance to user preferences.
- Organized product information to support comparisons and personalized recommendations.
- Contributed to the presentation and interpretation of recommendation results.

Sentiment Analysis-Based Ranking System May-2024 to Aug-2024

- Collected and organized customer feedback data for sentiment analysis.
- Performed data preprocessing to prepare textual feedback for analysis.
- Explored customer opinions to identify positive, negative, and neutral sentiment patterns.
- Evaluated product feedback to identify trends in customer satisfaction and preferences.
- Organized sentiment analysis results to support product comparison and ranking.
- Focused on presenting analytical findings in a structured and understandable format.

Solar Panel Fault Detection By Category Sep-2024 to Dec-2024

- Organized solar panel fault detection results into structured datasets for analysis.
- Categorized detected faults based on fault type and affected panel section.
- Analyzed fault counts, no-fault counts, and total detection records.
- Examined fault-related loss and gain metrics to support performance assessment.
- Compared fault categories to identify patterns in detected panel issues.

ACHIEVEMENTS

- **Delivered corporate training on Python Full-Stack at SPS Pune.**
- **Served as an Industrial External Examiner for SIT Engineering College, Ichalkaranji, Kolhapur.**
- **Conducted industrial training programs at J.J. Magdum Engineering College, Jaysingpur, Kolhapur.**

CERTIFICATIONS & PARTICIPATIONS

- **Web Development Workshop @ Techno-Tweet 2K17 (Walchand College of Engineering)**
- **Industrial Training Program in Android & PHP Technology, Pune**
- **Flipkart SCOA Pre-Assessment Certificate**
- **AWS Cloud Assessment Certificate**
- **NPTEL Certificate : 1. AI Concepts 2. Applied Positive Psychology.**
